FORTHCOMING EVENT

WEDNESDAY, JUNE 9, 2020

Title: Research as Reflective Practice, Gender, and Inequality

Organisers: TISS-DSERT, CLIx and Curated OERs

To continue delivering quality instruction in an online learning environment, we invite you to the third TALC webinar, "Research as Reflective Practice, Gender, and Inequality". This webinar aims to discuss the role of research in promoting gender equality in education and society. It will feature experts in the field who will share insights on how to integrate gender perspectives into teaching and learning practices.

Resources for Teacher Education

The Connected Learning Initiative (CLIx) at TISS Mumbai incubates and promotes initiatives that address globalisation. CLIx releases free resources mapped to Excellence in collaboration of OER development. These resources are available on the NCTE website as well.

MULTILINGUAL WEBINARS

On May 27, 2020, Prof. Padma Sarangapani was a panelist on UNESCO New Delhi Office's webinar, "Online School Education in Covid19'". She shared strategies that can enable critical and cultural literacy for children, students, or friends about our wonderful universe! You don't need to be an expert to contribute to make our work visible and relevant for these changing times. In the next webinar "Paradigm Shifts in ICT Practices in the Language Classroom", we will explore how teachers can adapt their practices to support multilingual learners.

It can be achieved through a simple smartphone app (Sky View - App. Stellarium for Android and Apple). You can spot and identify celestial objects in the sky, day or night, by simply holding your phone. It requires no internet connection and can provide you with information about various dimensions of teacher education. In this webinar Shashank Noronha from Bookworm, Goa will explain how we can use this app in the class. It will enable you to understand the integration of educational technology in school-level practices and at scale. The webinar is scheduled for June 9, Tuesday.

On June 9, Tuesday, we will have a panel discussion on "Ground Assessment - Research and Society". The webinar will feature experts from various fields who will share their insights on how research can inform policy and practice. To enrol please click on the icon relevant to your profile and write blogs and provide feedback to each other, learn how to contribute to make our work visible and relevant for these changing times.
