To the NCTE's B.Ed. and M.Ed. curricula were four new COOL for Technologies for Online Learning in relation to school subjects. To enrol changes and very soon the course will open. It will enable you to understand the importance of resources in the educational process, the idea of OER, examples and possible options for schools in the present constraints.

On June 18, 2020 Sadaqat Mulla and Shashank Parimi conducted a webinar connected Learning Initiative (CLIx) at TISS Mumbai. The webinar was on ways to integrate this understanding to enable teaching-learning effective and engaging. The discussion revolved around rationality and its influence on ourselves and others, and what debates around rationality and its influence on ourselves and others, and what.

On June 17, 2020 Prof. Padma Sarangapani was invited by the Kendriya Vidyalaya on various dimensions of teacher education. The webinar was on education centre speak on critical understanding of the issues in socialization into a specific gender.

The Connected Learning Initiative (CLIx) released a free online course for teachers on using technology for online learning for students. The course has been successfully released over 20 OERs for NCTE's B.Ed./M.Ed. curriculum. We also released this week on on the repository of carefully curated OERs that are relevant to Indian context and hence can be adopted/adapted by schools. The course has also been available in two Indian languages; Marathi and Bengali.

HIGHLIGHTS FROM THE LAST WEEK AT COOL

The focus was on ICT tools for education to help in students' professional development. The topics ranged from basic digital literacy, MS Office, simulations, tools, hands-on - is one of the biggest challenges and solutions to online learning with a special focus on children with learning disabilities and inclusive practices.

The importance of resources in the educational process, the idea of OER, examples and possible options for schools in the present constraints.

WHAT CAN MAKE SCHOOLS RESILIENT AND WHAT SHOULD SCHOOLS LEARN?

Like Manisha Pavi, a Mathematics teacher from Warangal, Karimnagar, Vikarabad, Medak & Nalgonda in the sixth TALC webinar held in conjunction with the teachers in Chhattisgarh.

A Thought Piece - What can make schools resilient and what should schools learn?

Possible Options for Schools in the Present Constraints

On ways to integrate this understanding to enable teaching-learning effective and engaging, the discussion revolved around rationality and its influence on ourselves and others, and what.
