

Post Graduate Diploma in Operation Management

Course Introduction

Operations management is an area of business concerned with the production, designing and controlling the production of goods and services, it involves the responsibility of ensuring that business operations are efficient in terms of using as little resource as needed, and effective in terms of meeting customer requirements. Also, It is concerned with managing the process that converts inputs (in the forms of materials, labour and energy) into outputs (in the form of goods and services). Operation management covers sectors like banking systems, hospitals, companies, working with suppliers, customers, and using technology. Operations is one of the major functions in an organization along with supply chains, marketing, finance and human resources. The operations function requires management of both the strategic and day-to-day production of goods and services.
