

LOGISTICS

Introduction of the Sector

Logistics is the backbone of the economy. It affects all industries in three sectors – agriculture, manufacturing and services. It includes all activities of the supply chain such as transportation, customer service, inventory management, flow of information and order processing. Other activities of the supply chain are warehousing, material

handling, purchasing, packaging, information dissemination and maintenance among others. It is estimated that the total workforce will increase from current 21 million to over 31 million by year 2022. That means, this sector alone will generate additional requirement of over 9 million people across all the modals-roads, railway, ports and aviation.

Post Graduate Diploma in Supply Chain and Logistics Management

Course Introduction

Supply Chain and Logistics Management is a field which is constantly evolving; in which updated and specialized knowledge is essential. Companies today seek candidates who not only have excellent knowledge of their field and specialist skills, but who can cope with dynamism and lead the company successfully through changes.

The innovations of the emerging markets, as well as the globalization process and technological changes require highly trained professionals, able to face the challenges of the financial areas of corporate business. They seek individuals who can represent the company in a positive light when dealing with

clients and transmitting in them, confidence of the company's ability to manage the business.
